

SHAIK MOHAMMED YOUSUF ABDULLAH

MEP Design Engineer

Hyderabad, Telangana, India | +91-7993171808 | Shaikyousuf0802@gmail.com

PROFESSIONAL SUMMARY

MEP Design Engineer with 3+ years of experience designing, coordinating, and executing HVAC, Fire Fighting, Plumbing, and Electrical systems for commercial and residential developments, including high-rise buildings, in accordance with ASHRAE, NFPA, and SMACNA standards. Proven expertise in HVAC system design and load calculation (Split, Ductable Split, and VRV up to 100 TR), duct sizing, and fire sprinkler and fire pump system design, using AutoCAD, Revit MEP, HAP, and Duct Sizer. Skilled in preparing BOQs, material submittals, method statements, shop drawings, and project schedules, and in coordinating with clients, consultants, and site teams to ensure on-time, code-compliant delivery across 5+ concurrent projects. Seeking to bring proven HVAC and Fire Fighting design expertise to an MEP engineering role in the UAE.

TECHNICAL SKILLS

- Design & Modeling Software:** AutoCAD, Revit MEP, SolidWorks, Creo, Inventor, ANSYS
- HVAC Design Tools:** HAP, Duct Sizer, E20-FORM
- Codes & Standards:** ASHRAE, NFPA, SMACNA
- NDT Testing:** PT, MPT, RT, RTFI, UT, VT (Certified)
- Office Suite:** MS Word, Excel, PowerPoint

CORE COMPETENCIES

- HVAC System Design & Load Calculation (Split, Ductable Split, VRV up to 100 TR)
- Fire Fighting System Design (Sprinklers, Fire Water Tanks, Fire Pumps)
- Duct Design & Duct Sizing Calculations
- Plumbing System Design (Cold/Hot Water, Drainage)
- BOQ Preparation, Material Submittals, Method Statements & Shop Drawings
- MEP Coordination — Clients, Consultants & Contractors
- Project Scheduling & Planning
- AHU, FCU, FAHU Selection & Chilled Water Systems
- Smoke Management, Staircase Pressurization & Ventilation
- Value Engineering & Coordination Drawings

CERTIFICATIONS

- NDT Certifications — Penetrant Testing (PT), Magnetic Particle Testing (MPT), Radiographic Testing (RT), Real-Time Radiography (RTFI), Ultrasonic Testing (UT), Visual Testing (VT)
- be10x AI Tools Workshop — AI-powered presentation design, data analysis, and coding/debugging
- Autodesk Revit MEP / AutoCAD Professional

EDUCATION

Bachelor of Technology (B.Tech), Mechanical Engineering

Jawaharlal Nehru Technological University (JNTU) — 2022

PROFESSIONAL EXPERIENCE

MEP Design Engineer — Suntech Building Services *December 2022 – February 2026 | Hyderabad, India*

- Designed HVAC systems and performed load calculations for wall-mounted split, ductable split, and VRV units up to 100 TR capacity, ensuring full compliance with ASHRAE standards and client specifications. Successfully supported delivery of 5+ concurrent projects while maintaining compliance and project schedules.
- Performed duct design and duct sizing calculations in accordance with SMACNA guidelines across 5+ concurrent commercial and residential projects.
- Designed fire fighting systems, including sprinkler networks, fire water tanks, and fire pump systems, for high-rise buildings in compliance with NFPA and local fire safety standards.
- Designed plumbing systems covering cold water, hot water, and drainage networks, including overhead/underground tank and pump sizing.
- Prepared BOQs, material submittals, method statements, shop drawings, and project schedules; coordinated approvals with consultants and clients to keep projects on schedule.
- Executed and commissioned ducting, piping, and centralized air conditioning, split, and package A/C installations across 5+ projects.
- Conducted field verification and quality inspections of MEP installations alongside site supervisors and foremen; maintained accurate as-built drawings.
- Delivered weekly progress reports to stakeholders, supporting on-time, on-budget execution across multiple simultaneous projects.

Key MEP Projects Delivered

- Design & installation of MEP systems — Kollasoft India Pvt Ltd, Hyderabad
- Design & installation of MEP systems — Platina, Gachibowli, Hyderabad
- Proposed apartments — Leela Homes, Guntur
- Proposed commercial building — Modern Builders, Hyderabad
- Proposed residential villas — Happy Villas, Nanakramguda, Hyderabad

Additional Mechanical Design Contributions

- Contributed to structural design of oil rig mast structures using client-supplied skeleton models to European standards, verifying sub-assemblies for ISO metric compliance (Drillmec project).
- Converted 2D submarine valve drawings into 3D models for manufacturing and quality assurance (DMDE project).
- Supported conceptual and detailed design of an emergency aircraft arresting gear (energy absorber) system, reviewing parts for ISO metric compliance and market availability (DMDE project).

PERSONAL DETAILS

Nationality: Indian

Date of Birth: 08-FEB-2001
